2. Completion of interview with household

☐ interview completed

☐ interview not completed

If the interview was not completed (answer no. 2), we move on to providing reasons (item 3), and if it was completed, we move on to collective information on individual interviews (item 4).

3. Reason for failure to complete the interview  
Choose one answer by entering its number in the square.

The interview was not completed, although the household was contacted, because:

1. the household cannot participate in research (old age, illness, intoxication)
2. it is a household of foreigners (beyond the scope of research)
3. the household initially refused to participate in research (perhaps they will agree to participate in subsequent years)
4. the household finally refused to participate in research now and in the future

It was not possible to contact the household (although its location was determined), because:

5. whole household was temporarily absent (e.g. on vacation)
6. nobody was found home

The location of the household was not determined, because

7. the address, provided on the list, could not be found (e.g. there is no such address, no inhabitants, liquidation of dwelling)
8. the household changed the place of residence and its new address could not be determined
9. the interview was not completed due to other reasons (for example the household moved abroad, all persons moved to a collective residence facility)

4. Collective information regarding individual interviews (all household members, who were over 16 before 01 January 2005, are subject to individual interview)

4.1. Number of persons in household, subject to individual interview

4.2. Number of individual interviews conducted

4.3. Number of individual questionnaires completed not in accordance with the instruction

5. Does the household agree to participate in research in the subsequent years?  
(Choose one answer by circling the appropriate number)

☐ 1. YES  ☐ 2. NO  ☐ 3. DOES NOT KNOW YET

I hereby confirm that the information, presented in the questionnaire, was gathered in accordance with the provided research procedure

People are different. They live in different conditions and feel differently about what happens to them everyday; they cope in different ways with whatever life brings to them.

This questionnaire is about how you perceive your life. Most questions should be interesting, some may be boring and tiresome, many will be easy – this is about your life and not some unknown problem; however, some questions will be difficult. Please answer them as accurately as you can.

At some points you may have a feeling that you have answered the question already, and we are asking it again in a different way. And you will be right. We are seeking the best way to ask questions. Don’t be surprised when you find that we jump over from one topic to another – the sets of questions have been put in a random order.

Your can be sure of our discretion. All answers will be used only for research purposes within the confines of collective statistical analyses.

Different possible answers may be provided along with questions. Please underline the one, which corresponds best with your situation. In case of some questions, it will be possible to underline more than one answer. If there are no ready answers below a question, please enter your answer in the space provided.

We would like to ask you kindly to fill out the questionnaire on your own, without any help from other household members. This is about individual assessments and feelings, and not about opinions consulted with other people. If you are unable to answer any question, please ask the interviewer for assistance.

INSTRUCTION
Since the information you provide will be read mechanically, please read carefully the instruction below and follow it strictly.
In questions where you are asked to select one or more answer, please mark your choice by marking the square next to the selected answer.
