2. Completion of interview with household:
1. □ interview completed
2. □ interview not completed

If the interview was not completed (answer no. 2), we move on to providing reasons (item 3), and if it was completed, we move on to the collective information on individual interviews (item 4).

3. □□ Reason for failing to complete the interview

The interview was not completed, although the household was contacted, because:
1. the household cannot participate in research (old age, illness, alcohol abuse)
2. it is a household of foreigners (beyond the scope of research)
3. the household initially refused to participate in research (perhaps they will agree to participate in subsequent years)
4. the household refuses to participate in research now and in the future

It was not possible to contact the household, although its location was determined, because:
5. the whole household was temporarily absent due to a stay abroad
6. the whole household was temporarily absent due to vacation
7. the whole household was temporarily absent for unknown reasons
8. there was nobody home
The location of the household was not determined because:

9. the address provided on the list could not be found (e.g. there is no such address, no inhabitants, liquidation of dwelling)
10. the household changed the place of residence and its new address could not be established
11. the interview was not completed due to other reasons (e.g. the household moved abroad, all household members moved to a collective accommodation facility)

4. Collective information regarding individual interviews (all household members who turned 16 prior to January 1st 2007 are subject to an individual interview)
   4.1. Number of persons in household subject to individual interview □□
   4.2. Number of individual interviews conducted □□
   4.3. Number of individual questionnaires considered to be filled out improperly □□

5. Does the household agree to participate in research in the subsequent years? (Choose one answer by circling the appropriate number)
   1□ YES 2□ NO 3□ DO NOT KNOW YET

I hereby confirm that the information presented in the questionnaire was gathered in accordance with the provided research procedure

SOCIAL DIAGNOSIS 2009
Independent study of conditions and quality of life in Poland

PART II Individual questionnaire

WOMAN □□
Household identification number (same as in Section I C) □□□□

Person number (copy from Section I C) □□ Fixed number (copy from Section I C) □□□□□

Name (copy from Section I C)

People are different. They live in different conditions and feel differently about what happens to them everyday. They cope in different ways with whatever life brings to them.

This questionnaire is about how you perceive your life. Most questions should be interesting, some may be boring and tiresome, many will be easy. This is about your life and not some unknown problem even if some questions are difficult. Please answer them as accurately as you can.

At some point you may have a feeling that you have answered the question already and we are asking it again in a different way. And you will be right. We are seeking the best way to ask questions. Don’t be surprised when you find that we jump from one topic to another because the sets of questions have been put in a random order.

Your can be sure of our discretion. All answers will be used only for research purposes within the confines of collective statistical analyses.

Different possible answers may be provided along with questions. Please underline the one which corresponds best with your situation. In the case of some questions it will be possible to underline more than one answer. If there are no ready answers below a question, please enter your answer in the space provided.

We would like to ask you to kindly fill out the questionnaire on your own, without any help from other household members. This is about individual assessments and feelings, and not about opinions consulted with other people. If you are unable to answer any question, please ask the interviewer for assistance.

INSTRUCTIONS
In questions which it is necessary to select one or more answers, please mark your choice by placing a checkmark next to the selected answer. In questions which we ask for your assessment, please write the appropriate number in the square. If the scale of assessment for the question looks like this:

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
</tr>
</thead>
<tbody>
<tr>
<td>completely not important</td>
<td>very important</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Then the intermediate numbers (2, 3, 4, 5, 6) mean that the lower the number, the less important a given issue is (2 is less important than 3) and the greater the number, the more important the issue is (6 more important than 5).

In questions which a numerical value should be provided, please put it in the correct squares, making sure that the last digit is in the last square.

3. Instruction for interviewers

INSTRUCTIONS CONCERNING THE ORGANIZATION AND RULES OF THE FILLING OUT OF QUESTIONNAIRES FOR THE RESEARCH PROJECT “SOCIAL DIAGNOSIS 2009” R5

Introductory remarks

“Social Diagnosis” is a cyclical project, repeated with the same sample of households. In the upcoming fourth wave (R5), we plan to examine all households which participated in the third wave of the panel research (R4) and new households.

In year 2009, only those households will be examined (questionnaires for households which are included in the collective list sent to the Voivodship Statistical Offices by e-mail on 08.01.2009 or later. If the household is on the list, but any of its current members are not, they are assigned consecutive numbers after the last number from the list of year 2007.

Data on households is gathered on the basis of the interview conducted with the household head or a person who knows a lot about the household (part I of the questionnaire). Household members aged 16 (those, who turned 16 no later than on the 1st March, 2009) and older fill out part II of the questionnaire on their own in the presence of a polister. If the respondents cannot fill out this part on their own, the polister is obliged to help them. Men cannot be given questionnaires for women and women cannot be given questionnaires for men because the respondent’s gender is coded in the questionnaire.

Definitions, classifications and groupings are largely consistent with those used in research based on the samples of households conducted by the Central Statistical Office. The proposed additions or slightly different qualifications are associated with the recommendations of Eurostat for research on households.

In the case of households which were included in the R4, apart from the full form for the fourth wave of research, you will receive the printouts from part C of the form R4 (number of household, number of voivodship and district, numbers of household members, their gender and year of birth as well as fixed numbers of household members). Please conduct the interview section C on the basis of the printouts from the fourth wave of research that is, taking into account all persons from the household included in printouts from R4 and the new household members. It is necessary to keep in mind that the household members are to be numbered in the same way as in wave R4 and persons who joined the household after year 2007 are assigned the consecutive numbers after the last number from the R4.

If the number of persons is greater than 8, all persons with numbers above 8 are entered in a separate Section C sheet. For persons who left the household permanently after the third wave, we ask only that you fill out of the selected rows: rows 42 (enter the seven digit symbol of household status in the study: 1 the household participated in the third wave (R4) and it lives at the same address ⇒ we go to point 1 2 the household participated in the third wave, but its address in the country has changed ⇒ we do not conduct the interview (we do not follow this household) 3 the household participated in the third wave of research, but it moved abroad or all household members have moved to collective accommodation facilities ⇒ we do not conduct the interview 4 a new household (it did not participate in the third wave of research) and it was drawn for the purpose of the current wave).

For persons who left the household permanently after the third wave, we ask only that you fill out of the selected rows: rows 42 (enter digit symbol of the class of place of residence in which the household lives, according to the list of symbols provided below: symbol 1 cities inhabited by population of 500 thousand or more 2 cities inhabited by population of 200–500 thousand 3 cities inhabited by population of 100–200 thousand 4 cities inhabited by population of 20–100 thousand 5 cities inhabited by population smaller than 20 thousand 6 the rural area.

point 4 – enter the identification number of the household. It is a five-digit number which does not change during the subsequent research cycles, therefore, for those households which participated in the previous wave (R4), it will be the same as in year 2007; for new households, established as a result of a division of the household examined in year 2007, it will be assigned from the pool of numbers reserved for a given voivodship especially for these households.

point 5 – enter the one-digit symbol of the source of income of the household in accordance with the list of symbols provided below:

Part II (individual questionnaire)

The pollster fills out only the first page (copying from section C the household number, the number of the person and his/her first name); the rest is filled out by the respondent in the presence of the pollster.

In exceptional situations, the respondent may fill out the questionnaire without the pollster being present; in such cases, it is necessary to attach an envelope, so that other members of the households cannot see the filled-out questionnaire before it is picked up by the pollster.

Please explain the rules of filling out of the questionnaire in a simple manner (page two); particularly, the meaning of the numerical scales, defined verbally only at the ends. Please point out to the respondent that in the date of birth on page 3, Roman numbers cannot be used (e.g. 15 02 78 and not 15 II 78).
